

# Backflow Assembly Testing

New state regulation requires cross-connections between potable water systems and where a containment hazard exists to be tested and certified every year to ensure they are working properly. The District has partnered with Backflow Solutions, Inc. (BSI). Starting Oct. 15, BSI will send backflow assembly due and past-due notifications. Residents are responsible for having devices tested. The tester is required to submit results to BSI Online. Call your tester/contractor to schedule your annual backflow assembly test. Please contact BSI with any questions: 888-966-6050 or [support@backflow.com](mailto:support@backflow.com).
